We are the world’s leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We link and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us. At BASF, careers develop from opportunities.

As BASF is one of the biggest foreign investors in China, an Innovation Campus in the field of Polymer and Advanced Material Research will be established. This innovative Research and Development Campus is situated in Shanghai. For this Innovation Campus we are looking for a

Polymer Processing Expert (m/f) Shanghai

What you can expect:
This position is located in Shanghai where BASF is establishing an Innovation Campus. You will start a 6-12 months training at our research facilities in Germany and continue your research activities within our Asian international research teams in Shanghai, China.
In co-operation with our product development department, you will plan and execute R&D projects for new or improved polymer materials. In addition to this, you will be responsible for the handling of engineering tasks in the field of polymer processing. You will also design compounding processes for twin screw extruders as well as plan and evaluate pilot plant trials in various scales. Beyond this, you will identify new or improved technologies in co-operation with internal and external experts. You will also create a highly developed knowledge network.

What we expect:
You have earned a PhD degree in polymer science, material science or plastics technology, and are currently looking for a new challenge.
During your studies or former work experience, you already gained basic knowledge of polymer processing technologies, such as extrusion and compounding. You enjoy working and communicating with interdisciplinary teams and you are willing to strive together and to realize solutions in a team. In addition, you are a creative and proactive personality with a highly responsible work attitude.

We offer:
Responsibility from day one in a challenging work environment and "on-the-job" training as part of a committed team and excellent career opportunities in an international company.
Expect to be surprised by the exciting range of career opportunities at BASF.
